

Product Name: Mixed refrigerant R402B

|                    |                          |                                                         |
|--------------------|--------------------------|---------------------------------------------------------|
|                    | Molecular formula        | R125/R290/R22                                           |
|                    | constitute               | pentafluoroethane<br>/Propane/<br>chlorodifluoromethane |
| Physical Property: | Molecular Weight         | 94.71                                                   |
|                    | Boiling Point ,°C        | -47.2                                                   |
|                    | Critical Temperature ,°C | 83.0                                                    |
|                    | Critical Pressure Mpa,   | 4.53                                                    |
|                    | GWP                      | 0.50                                                    |
|                    | ODP                      | 0.02                                                    |

|                |                    |                      |
|----------------|--------------------|----------------------|
|                | Purity, %          | ≥99.8                |
|                | Moisture, PPm      | ≤10                  |
| Quality Index: | Acidity, PPm       | ≤0.1                 |
|                | Vapor Residue, PPm | ≤100                 |
|                | Appearance         | Colorless, No turbid |
|                | Odor               | no strange stench    |

Packing: Disposable cylinder 30lb/13.6kgs; Recycle cylinder  
400L,800L,926L ; ISO-Tank.

Application:

Retrofitted Refrigerant for R22.
